Update...

A couple of edits I missed in this morning's version.

Joe,

Good points. I like the flexibility created by carrying two build alternatives. I have incorporated all of them with two changes (and a few fill-ins and minor wording changes):

- 1) I re-wrote the first paragraph under Background to be factually correct in the order of events related to the original NOI.
- 2) I eliminated reference to transit technology. We completely acknowledge the need to establish the technology prior to the Final EIS, and are only trying to work out if we will be carrying several technologies into the draft EIS, or refine based on technical merits prior to the draft.

I wanted to give you an opportunity to look this back over and see if you had any outstanding concerns before we make an official submittal.

Thanks a lot, I appreciate your advice,
Lawrence

Joe,

Thank you for meeting with me last week. I appreciated getting to know who you are and your ideas on this project.

AR00149715

Here is the draft Notice of Intent that you discussed with Toru and Mark this morning. I have put preliminary dates in the NOI that would correspond to an issuance around February 28/March 1 to provide a 30 day comment period. Dates may be adjusted of course. Please let me know if there is anything else that I can do.

Lawrence Spurgeon
